To Whom it may concern,

On behalf of Two Rivers Economic Growth, please accept this letter of support in regard to the Keystone XL infrastructure project. The Keystone XL company has gone above and beyond in support of not only our communities but state-wide. They have proved that their standards and state of the art technology will keep our environment safe and will be monitored 24 hours a day, 365 days a year through a centralized high-tech center. Aerial and land inspections will be done regularly, as well to ensure that nothing is missed.

The tax revenue created by this project will help our school system, roads, and new infrastructure in these small communities. Thousands of high paying jobs will be created, which is crucial during these hard times. The Keystone XL has been an extremely important part of our community and we would love to see this project move forward for our nations' sake.

Thank you for your time.

Sincerely,

A handwritten signature in blue ink that reads 'Keegan M. Morehouse'.
